

LUBETEC LUBRICANTS

LUBRICANTS OF ADVANCED TECHNOLOGY

LUBETEC offers a full range of technical maintenance products for industrial applications including premium oils, greases, degreasers, aerosols and metalworking fluids. LUBETEC uses the highest lubrication technology to produce products that will meet the most demanding requirements and will reduce the overall maintenance budget by better performance. A full line of LUBETEC industrial maintenance products is available to meet most of the maintenance requirements in your industry.

LUBETEC OILS

Full range of quality hydraulic, circulation and transmission lubricating oils for industrial applications

LUBETEC HLP

ISO VG 22, 32, 46, 68
DIN 51 524 Part2 HLP

Premium quality hydraulic oil providing anti-wear, anti-oxidation and anti-corrosion properties. Recommended for hydraulic systems operating at high pressure.

LUBETEC MACHINE GUARD

ISO VG 46, 68, 100, 150, 220, 320
DIN 51 524 Part2 HLP

Premium quality circulation oil reinforced with an additive combination to achieve optimal protection against wear, rust and corrosion. Recommended for continual re-use systems involving pumps, piping, valve splash, batch, ring oiling and ancillary equipment.

LUBETEC HYDRO GUARD

ISO VG 15, 22, 32, 46, 68, 100 en 150
DIN 51 524 PART3 TYPE HVLP

Top quality hydraulic oil providing anti-wear, anti-oxidation and anti-corrosion properties together with high viscosity index values. Recommended for hydraulic systems operating at high pressure and wide temperature fluctuations.

LUBETEC GEAR EP

ISO VG 46, 68, 100, 150, 220, 320, 460, en 680
API GL3, DIN 51 517 PART3 TYPE CLP

Extreme pressure gear oil with high viscosity index. Separates quickly from water and has excellent anti-foam characteristics. Recommended for use in spur, helical, bevel and worm gear configurations subject to heavy or shock loads.

LUBETEC GEAR GUARD

SAE 80W90, 85W140
API GL5

Premium quality hypoid extreme pressure gear oil for heavily charged transmissions in industrial and automotive applications.

LUBETEC AIR LINE GUARD

ISO VG 32, 46, 68
DIN 51 524 Part 2 HLP

Specially developed high quality and high surface tension oil for use in fine mist systems where micro-fog will keep equipment properly lubricated.

LUBETEC GREASES

Complete range of greases for the most extreme operating conditions.

LUBETEC BLACK GUARD

Premium quality grease with graphite for open or enclosed gears systems subject to heavy loads and wet operating conditions

LUBETEC RED GUARD

Multi-purpose lithium-complex grease with EP, anti-corrosion and anti-oxidation additives providing extended lubrication intervals, even under arduous conditions and over a wide operating temperature range.

LUBETEC GOLD GUARD

Long life aluminum complex grease for applications subjected to high load and extreme water conditions under varying temperature conditions.

LUBETEC EXTRALITH EP

Premium quality lithium grease reinforced with EP additives suitable for a wide range of automotive, industrial or marine applications.

LUBETEC HIGH TEMP

Non-melt bentone clay based grease for high temperature applications. Good water resistance and suitable for high speed applications.

LUBETEC EXTRA TEMP

Non-melt bentone clay base grease for high temperature applications. Free of dry lubricants and suitable for average speeds.

LUBETEC CS2

Top quality calcium-sulfonate complex grease recommended for difficult applications such as extreme pressure, water, heat or chemical attack

LUBETEC CONTACTA

Special lubricating grease formulated with bentone clay and reinforced with high purity graphite developed for extreme temperature applications, high voltage switches and electrical contacts.

LUBETEC MOLY GUARD

Premium quality lithium grease reinforced with Molybdenum disulfide (MoS_2) for applications subjected to heavy loads and vibrations.

LUBETEC AEROSOLS

Range of technical maintenance sprays meeting the highest requirements with an ozone-friendly propellant.

LUBE SHOT

Clear penetrating lubricant for fast and accurate loosening of jammed and rusted nuts, bolts and parts and to lubricate and protect fine mechanisms.

ALUMINIUM SHOT

Copper and lead free anti-seize assembly compound to protect and lubricate threads and components in extreme operating conditions of heat and vibrations.

PTFE DRY FILM

Grease-free dry lubricant with anti-adhesive effect on the basis of PTFE which adheres to all metal, plastic and wood surfaces.

ZINC SHOT

Resin based paint containing zinc powder which is ideal as a protective primer for all steel structures and gives extremely good adhesion to subsequent coats of paint.

SILICONE SPRAY

Spray based on pure silicones is an ideal lubricant and separating agent during production or servicing but it also acts as a preservative and care product for plastics, rubber and metal.

LUBETEC DEGREASER

BONDIS TFO2

High performance general purpose cold cleaner that will remove all petroleum contaminants, such as oil, grease, bitumen, semi-cured varnish and paint, waxes and adhesives, silicones and oil based ink. The product is non-flammable, non-hazardous and inherently biodegradable.

LUBETEC METALWORKING FLUIDS

High performance water soluble metalworking and grinding fluids designed in accordance with international health and safety trends and recommended for all types of machining of ferrous and non-ferrous materials.

LUBETEC 6400

Semi-synthetic watermix multipurpose cutting and grinding fluid with medium oil content

LUBETEC 3700

Fully synthetic transparent watermix metalworking fluid without hazardous components

The information given in this technical data sheet is to be considered as correct and is given in good faith but without warranty. Therefore, as we are unaware of the conditions in which our lubricants are used, we cannot be held responsible for all damages, caused during direct or indirect application. For detailed information about health and safety we refer to the MSDS of this product.
